

ABOUT US

Agar Management Consultancy specialises in helping individuals and businesses fulfil their potential. We believe that through helping people understand themselves and the people around them it creates a culture for success.

This is an interactive course that has been developed as an approach to support you with real time career coaching. It aims to guide you through the four main building blocks in career transition.

Explore the modules in more depth:

1

KNOW YOUR PRODUCT

Before you can present yourself to a potential employer or even start to determine the path that you wish to take, it is important to understand who you are and to have a clear picture of your skills, experience and aspirations.

Within this module we will look at working through several activities that will enable you to reflect and build a complete profile of you . . . your greatest asset.

2

PREPAING - GETTING YOUR PRODUCTS READY FOR MARKET

We take a moment to really focus on 'brand'. What is a brand and why is it so important. We will then look at how you can develop your personal brand that you can own, be proud of and which will support in launching 'you' - the best product ever!

3

RESEARCHING - TAKING YOUR PRODUCT TO MARKET

This module differs slightly from modules 1 and 2, as the focus is centred around supporting you in developing your own job searching strategies.

Therefore, not content heavy, but key thoughts and suggestions to help you develop and execute a job search that works for you.

4

LAUNCHING - SELLING YOUR PRODUCT

3, 2, 1 - Lift off! Module 4 is centred around selling your product (you) to the buyer (recruiting employer).

This process more than likely will focus on attending interviews and other assessment methods, as identified and requested by the recruiting employer.

We are offering free places on the course for the first 25 AHEP members **who register and attend** AHEP's Planning Your Next HE Career Steps
